#### Abstract

A correction is provided in order to legitimate the formal availability of the name *Hanleya brachyplax* (Polyplacophora, Hanleyidae), wrongly attributed to Simone & Jardim in Rios, 2009. The correct citation will be *Hanleya brachyplax* Jardim & Simone, n. sp., this paper.

#### Resumo

Uma correção é fornecida visando legitimar a disponibilidade formal do nome *Hanleya brachyplax* (Polyplacophora, Hanleyidae), erroneamente atribuída a Simone & Jardim in Rios, 2009. A autoria correta é *Hanleya brachyplax* Jardim & Simone, n. sp., esta publicação.

#### Introduction

The recently published paper “Redescription of *Hanleya brachyplax* (Polyplacophora, Hanleyidae) from the south-southeastern Brazilian coast” by Jardim & Simone (2010) was supposed to fully describe the species previously incompletely described in Rios (2009). The name *Hanleyia brachyplax* first appeared in Rios (2009: 20), but the establishment of the name did not meet the requirements of ICZN article 16.1 in not explicitly indicating the name as intentionally new; also it did not meet the requirements of article 16.4 in not designating a holotype. The paper by Jardim & Simone (2010) explicitly designated a holotype, but the requirements of ICZN article 16.1 still were not met.

In order to make the establishment of the name *Hanleya brachyplax* fully Code-compliant, we now formally introduce:

*Hanleya brachyplax* Jardim & Simone, n. sp.

Description [Art. 13.1.2]: The description of *Hanleya brachyplax* by Jardim & Simone (2010) is the description of *Hanleya brachyplax* n. sp.

Type material [Art. 16.4]: Holotype Museu de Zoologia, Universidade de São Paulo (MZUSP) 87263.

#### Acknowledgments

We thank Philippe Bouchet (Muséum National d’Histoire Naturelle, Paris, France ) for informing us of the problem and recommending the present course of action.
